Office Memorandum

UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: April 27, 1950

FROM : SAC, Chicago

SUBJECT: SECURITY INDEX - VITAL FACILITIES

Rebulet April 17, 1950.

List

There is enclosed herewith in accordance with request in Dulet the original list of Security Index subjects of this office and one page supplement thereto. There are also enclosed a list of additional Security Index subjects as reflected by the files of this office and a list of subjects of Security Index recommendations forwarded previously to the Bureau.

Employment in a vital facility has been indicated by noting the code number of the facility adjacent to the names on the above lists where applicable. No entry indicates the subject is not employed in a vital facility. Race has been indicated on the above lists immediately preceding the date of birth. Cancelled Security Index subjects have been indicated by a "C" following the name.

RE: SECURITY INDEX - VITAL FACILITIES

Dear Sir:

X SECURITY INVESTIGATIONS OF INDIVIDUALS

Re Bureau letters April 6 and April 17, 1950.

There is being forwarded herewith the original list of security index subjects furnished by the Bureau with referenced letter of April 17. This list now shows the vital facility code number concerning those individuals who are employed at a vital facility in the State of New Mexico. Also shown on this list is the race of all security index subjects maintained in this office. The program has been completed and all security index cards concerning those individuals employed at a vital facility have the vital facility code number placed thereon. ~~CONFIDENTIAL~~

Regarding the sources and contacts mentioned in Bureau letter of April 6, this program is in the process of completion. Contacts and sources are being developed at the new vital facilities in New Mexico, as furnished by this letter.

47 This program will be completed and the Bureau will be advised on or before May 15, as requested.

Very truly yours, *N* ~~CONFIDENTIAL~~ 62-1

INTERNAL SECURITY - C

During the latter part of 1948 and the early part of 1949 letters were directed to your office in all cases on Security Index subjects in which reports had not been submitted for over a year requesting that those cases be brought up to date.

It is noted that you have been giving these cases attention, however a considerable number of them have not been handled as yet.

The Bureau desires to be advised at this time as to the status of this project in your office and the length of time estimated to complete it.

In view of the international situation this matter should be given prompt attention.

In addition to handling the above above-referred-to cases, it is presumed that you are taking appropriate action to see that you have current addresses and places of employment of all subjects in your Security Index.

Office Memorandum • UNITED STATES GOVERNMENT

FROM :

SUBJECT:

SECURITY INDEX STATISTICS

- GENERAL

The Security Index according to the Statistical Section records as of June 15 contain a total of 11,930 individuals. An analysis of this figure reflects the following:

Sex:

Male	8,753
Female	3,177
Total	11,930

Nationalistic Tendency or Organizational Affiliation:

Communist Party, USA	-	11,491
Socialist Workers Party	-	308
Independent Socialist League	-	45
Nationalist Party of Puerto Rico	-	77
Independent Labor League	-	2
Revolutionary Workers League	-	1
Proletarian Party of America	-	6
Total	-	11,930

Citizenship Status:

Native Born	-	9,258
Naturalized	-	2,281
Alien	-	296
Unknown (Investigation Continuing)	-	95
Total	-	11,930

Of the above, 3628 have been tabbed for priority apprehension in the event of an emergency under the Detcom program. The priority detention group consists of top functionaries, key figures, Comsab subjects and other individuals who should be given priority apprehension for some particular reason.

1,364 have been tabbed under the Comsab program as possessing the best potential to be Communist saboteurs. 1,587 have been identified as key figures of which 70 have been identified as top functionaries.

In addition to the 11,930 cards maintained by the Statistical Section, the Security Index Desk itself maintains 168 cards which are cards on espionage subjects, U. S. Government employees, Foreign Government employees, United Nations employees, Atomic Energy program employees and prominent persons. This represents therefore a grand total of 12,098 Security Index cards presently maintained.

Office Memorandum • UNITED STATES GOVERNMENT

SUBJECT:

SECURITY INDEX - GENERAL

In view of the current tense international situation, it is believed desirable that our various field offices again be alerted to insure that they are including all individuals who are potentially dangerous to the internal security of this country in the Security Index. There is no change in policy in the attached SAC letter, but we are merely reiterating instructions previously sent to the field.

ACTION

It is recommended that the attached SAC letter be sent to the field.

UNRECORDED

7-11-50

(L) SECURITY INDEX -- In view of the present international situation, I again wish to call your attention to the importance of including in the Security Index the names of all individuals who might be potentially dangerous to the internal security of this country. It is realized that in the past certain criteria were set up to determine whether a particular individual should be included in the Index. In view of recent international developments, however, you should be constantly alert with respect to the individuals who are, in spite of the Korean situation, supporting the Communist cause and are active in it today. The information which your office is currently receiving from your informants regarding the activities of various individuals should be carefully analyzed to determine whether such individuals are potentially dangerous. I cannot emphasize too strongly that the responsibility for the inclusion of all such individuals in the Security Index rests with the respective offices.

In this same connection, the Bureau desires that subjects of espionage investigations be included in the Security Index in accordance with instructions contained in SAC Letter #97, dated October 19, 1949, where in your opinion such subjects remaining at liberty would constitute potential danger to the internal security of our country. It should be borne in mind that even though it is not possible to develop a prosecutable espionage case, investigation of the individual may still clearly reveal his potential dangerousness which would warrant the inclusion of his name in the Index.

In following the activities of the various individuals under investigation, you should also be constantly alert for any information which might indicate that Communists and members of other subversive groups may be violating Federal statutes over which the Bureau has investigative jurisdiction. This would include such violations as espionage, sabotage and sedition.

This matter must be given your personal attention.

Very truly yours,

John Edgar Hoover

Director

STRICTLY CONFIDENTIAL

July 25, 1950

SAC LETTER NO. 48
WASHINGTON 25, D. C. Series 1950

MEMO FOR MR.

(A) SECURITY INDEX AND RELATED MATTERS --

GENERAL

Preparation of Security Index Cards

Very shortly it will no longer be necessary for the field to prepare the 5 x 8 Security Index cards. The Bureau will in the future furnish these prepared cards to the field. By SAC Letter 97, Series 1949, you were advised that the Bureau had set up the Security Index on IBM tabulating cards at the Seat of Government. This system is in the process of expansion and as a result the Bureau will prepare the cards. It is expected that this system will be in operation within the next few weeks, however, until you actually receive the cards from the Bureau attached to the copy of form FD-122 you will continue to prepare your own. This practice will at first be instituted with recommendations for new Security Index cards, later for changes to existing cards, and eventually it is anticipated that all existing cards in the field will be replaced by the cards made at the Bureau. This change in procedure is both beneficial and necessary because of the increasing number of individuals in the Index, the increasing activities of the Index as to changes and the greater demands placed upon the Security Index. The sheer volume of detail in handling the Index requires greater streamlined operations.

The cards as prepared by the Bureau will be done strictly by mechanical means and an alphabetical and geographical card for each individual will be furnished by the Bureau. The cards will be completely typed and no additional

work need be done to the cards before filing by the office except to add the field division file number and the photograph and description on the reverse side of the geographical card. No changes should ever be made on the face of the Security Index card without specific instructions from the Bureau.

Vital Facilities

The code for the vital facilities and the list of the vital facilities has previously been furnished to you by letter dated April 6, 1950, and the instructions relating to implementing this program to the Security Index were furnished to you by letter dated April 17, 1950.

Forms and Procedures For Use With Security Index

There are currently in use two forms for the Security Index, Form FD-122 is used to recommend a new Security Index card or to make changes in an existing card and form FD-128 is used to change office of origin and transfer existing Security Index Cards. These forms and these procedures will continue to be used and followed. However, whenever these forms are used it will be absolutely necessary that an original and a thin white be forwarded to the Bureau. The thin white, appropriately stamped, will be used as the cover communication forwarding the new or corrected Security Index Cards to the field. They are, of course, to be filed in the main case file. In connection with form FD-122, it is noted that difficulty has been experienced in indicating organizational affiliation or nationalistic tendency in some cases. Line 6 on the form sets forth 3 common options as to organizational affiliation; either Communist, Socialist Workers Party or Independent Socialist League. Line 7 is captioned "Miscellaneous (Specify)." This line is intended for use if one of the 3 options on line 6 is not applicable, for example, Proletarian Party of America, Nationalist Party of Puerto Rico, etc. If in some cases it is not possible to show any organizational affiliation, organizational activities or organizational sympathies, it is permissible and proper on this line to show in lieu thereof the nationalistic tendency, for example, Russian, Bulgarian, Chinese, etc. This may well, of course, occur in cases such as espionage, intelligence investigations of Foreign Government employees and the like where it is impossible to show any affiliation, activities or sympathies with the Communist Party. Since this information is codified for tabulation purposes, long descriptive statements concerning the subject's activities are not desired.

In connection with the change of office of origin of Security Index Cards a caveat is in order. In the case where an auxiliary office is requested to verify the presence of the subject within its territory preparatory to changing office of origin and it is found that the individual is employed in a vital facility, the old office of origin should be advised in the return communication that the new place of employment of the subject is on the vital facility list and the vital facility code number of that place of employment. The old office of origin can and must, therefore, show that code number in conjunction with the employment on the appropriate space of form FD-128 when the office of origin is changed.

Names and Aliases on Security Index Cards and in Security Reports

A recent review of security reports and Security Index cards at the Seat of Government has reflected a widespread confusion as to what is necessary and desirable in the title of security reports and the names and aliases on Security Index cards. Two general errors have been found, (1) attempting to "create" aliases by making breakdowns of the full name of the subject and, (2) carrying, as the main name, a married woman under her husband's name. The basic Bureau rule is that the full and correct name as well as all aliases should be set forth in the title of security cases in accordance with the Handbook Part I, Section 46, page 31. Therefore, under (1) above if a subject's full name was _____ that full name should be set forth and the breakdowns of the name should not be shown as aliases, e.g.

_____, as these are all contained in the full and complete name. They are, therefore, not aliases. In the same vein it has been noted that obvious misspelling of the subject's name and phonetic spellings of the name as obtained from confidential informants have been set forth as aliases. This is also undesirable. Of course, variations in spelling of a name as used by the subject himself should be shown as should nicknames and true aliases. In connection with the rule that aliases need not be set forth in titles of reports after they have once appeared therein except as in accord with the cited handbook section there may be circumstances where for purposes of ready identification and clarity in communications that the full and correct name be followed in the title by the common alias. The Bureau has in mind such cases as

where the individual has not had his or her name changed by legal process from the full and correct name to the totally different one which the individual uses daily and is known by generally. In such instances it is permissible and desirable to carry in the title of reports and communications the full and correct name followed by the name commonly used. This practice should not be adopted promiscuously, however, and never in a case where the commonly used name is merely a variation or breakdown of the full and correct name.

In connection with married women, the Bureau also desires that their full and correct name be set forth, and as aliases the full maiden name and the husband's name, for example, Mary Jane Doe, nee Mary Jane Roe, Mrs. John Henry Doe. For each and every marriage that the woman subject has contracted at least two aliases will be developed. Again any true aliases and nicknames should be

UNRECORDED

7-25-50

included. The practice of using as the main name on married women the name of her husband is objectionable for two reasons: (1) in the eyes of the law Mrs. John Henry Doe is not any one specific individual and (2) it has caused considerable confusion in the past in reporting information and definitely identifying information with a specific individual.

It is not desired that any project be instituted to correct or change titles of all your Security Index cards and cases at the present time. However, the next time each case comes up for attention for address checks, reporting, or other reasons, the title must be thoroughly analyzed and if action is necessary to complete or change the name or delete names that are not in fact aliases, it should be done at that time.

It is emphasized that this whole discussion of titles relates solely to titles in security reports on individuals and to titles on Security Index cards. It in no manner affects or relates to the general indexing procedures of your office or of the Bureau.

This review of the security cards has also revealed that many cards are incomplete in diverse items of information. This is especially true of such items of information as date of birth, place of birth, citizenship status, employment and employment address. Again no project is desired at this time to bring all these data up to date but when each individual case comes up for attention the Security Index card should be reviewed to determine that the Bureau has been advised of all available and necessary data for the completion of the card and if this has not been done an appropriate form FD-122 should be executed.

The Security Index is the very heart of the Internal Security Program. I again wish to reiterate the need and the importance of maintaining the Security Index in an up-to-date and current status at all times. The data appearing on the card must be factually correct and every effort should be made to conform with the standard procedures in the handling of this program. The index, of course, must be in such a condition that it can be put to use immediately in the event of an emergency.

It is desired that these matters relating to the Security Index and security cases be brought to the attention of Agents working on these activities and that these instructions be thoroughly understood by them. You will be held personally responsible to ascertain that this is done.

Office Memorandum • UNITED STATES GOVERNMENT

DATE: July 26, 1950

TO : Director, FBI
FROM : SAC, New York
SUBJECT: SECURITY INDEX
INTERNAL SECURITY - C

CONFIDE

Rebulet dated July 10, 1950.

With regard to the letters which were directed to this office in cases on Security Index subjects, this is to advise that as of July 21, 1950, there were 383 cases pending in the New York Office on this project.

The Bureau will recall that formerly it was the policy of this office to place emphasis on those investigations where the individuals under investigation were not the subjects of Security Index Cards in order that it might be determined whether they warranted recommending Security Index Cards. Due to the tremendous volume of cases in this category, a great majority of the cases on Security Index subjects reopened during the latter part of 1948 and the early part of 1949 necessarily remained in an unassigned status until November, 1949. At that time a policy was adopted which would give priority to these cases. At the present time there are no unassigned cases in this category. Instructions have been issued to the agents to give all of them investigative attention at the earliest possible date and to submit reports reflecting the current activities of the subjects. It is estimated that the project will be completed within the next three or four months.

The Bureau is further advised that the New York Office has taken appropriate action to see that addresses and places of employment are current on all subjects in the Security Index. Within the past four weeks, approximately 2,100 of these subjects have been verified and it is anticipated that those remaining will be verified within the near future.

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

TO : The Director, Federal Bureau of Investigation DATE: July 25, 1950

FROM : The Attorney General

SUBJECT: Security Index List④ CONFIDENTIAL- GENERAL

I would appreciate receiving any geographical or other analyses which have been prepared with respect to this index. I would also like to be informed as to the standards which were used to qualify an individual for inclusion in this list.

The Attorney General

July 27, 1950

Director, FBI

CONFIDENTIAL

SECURITY INDEX LIST

Reference is made to your confidential memorandum of July 25, 1950, captioned as above, requesting geographical and other analyses which have been prepared with respect to the Security Index.

Please refer to my memorandum of July 6, 1950, to under instant caption which transmitted a current list of individuals appearing on the Security Index. That list is composed of 11,930 individuals. Attached hereto is an analysis of this figure reflecting the geographical breakdown of our field divisions.

Also attached hereto is an analysis of the Security Index list with regard to sex, nationalistic tendency or organizational affiliation, and citizenship status of the persons included in the list.

In your memorandum of reference you inquired as to the standards used to qualify an individual for inclusion in the Security Index. On September 16, 1949, I submitted a personal and confidential memorandum to captioned "Security Index" which set forth the standards upon which individuals are included in the Security Index. These standards are still in effect with the modifications as explained in the following paragraph.

With the advent of the current international situation brought about by the recent developments in Korea, the Communist Party and related groups have definitely and positively taken a stand against the policy of the United States. There can be no doubt that individuals who continue to be active members of these groups at this time have cast themselves on the side of the Soviet Union. We are, therefore, in addition to the standards set forth in my memorandum of September 16, 1949, considering persons for inclusion in the Security Index who are present, active, participating members of the Communist Party or related groups or who actively espouse the line of these groups, regardless of the individual's leadership in the Party, present employment or past activities.

Office Memorandum • UNITED STATES GOVERNMENT

TO :

DATE: July 7, 1950

FROM :

SUBJECT:

SECURITY INDEX - GENERALPURPOSE

To advise of the status as of today of the conversion project of the Security Index to the IBM and to recommend the issuance of an SAC Letter which will cover the operation of the new system in so far as the field is concerned.

BACKGROUND

As of this date the punching operations are just short of one hundred per cent complete. The balance of the punching operations consists primarily of picking up loose ends and making necessary corrections. The checking operation is approximately fifty per cent completed and it is anticipated as the punching operations are fully completed that the employees will be placed primarily on checking operations which should bring this phase of the changeover up to date at a very rapid rate.

In view of the fact that the new system will very shortly go into operation, the field should, of course, be advised as to the system and the few changes which will be necessary on their part. It should, of course, also be advised as to the layout of the card in order that there will be no confusion and certain consistent errors which appeared on a review of the Index during this changeover should be called to their attention in order to effect the appropriate corrections. Accordingly there is attached hereto a proposed SAC Letter calling to the field's attention the above-enumerated items.

RECOMMENDATION

That the attached SAC Letter be sent to the field.

218 changed to 37-6

Office Memorandum • UNITED STATES GOVERNMENT

TO : DIRECTOR, FBI
FROM : SAC, PHILADELPHIA
SUBJECT: SECURITY INDEX
AND RELATED MATTERS

DATE: August 2, 1950

Reference is made to SAC Letter No. 48, Series 1950, dated July 25, 1950.

The last paragraph of page one and the first paragraph of page two states, with reference to Security Index cards to be furnished by the Bureau:

"The cards will be completely typed, and no additional work need be done to the cards before filing by the office, except to add the field division file number and the photograph and description on the reverse side of the geographical card. No changes should ever be made on the face of the Security Index card without specific instructions from the Bureau."

The present practice in this Office is to make a numerical notation on the face of the alphabetical and the geographical Security Index cards indicating the appropriate geographical section in which an individual's geographical card is to be filed. This practice will be continued in the future unless advised to the contrary by the Bureau.

Page one of reference letter indicates that at a later date, a system will be put into operation by the Bureau whereby when changes occur in existing cards, the Bureau will furnish changed cards to the field. Information is obtained in the field necessitating the submission of Form FD-122 indicating changes in existing cards. It is not clear whether in such instances the field is to make the appropriate change on cards maintained by the field at the time FD-122 is submitted, pending the receipt of new cards from the Bureau, or whether the existing cards are to be retained unchanged until such time as corrected cards are furnished by the Bureau. Bureau advice is requested.

Page four of reference letter indicates that form FD-128 will continue to be used when a Security Index subject moves from one territory to another, and that a thin white will be used by the Bureau as the cover communication forwarding the new or corrected Security Index cards to the field. Bureau advice is requested as to what disposition is to be made in the interim of the Security Index cards maintained by the Office covering the territory from which the individual moves.

218 changed to
37-6

SAC, Philadelphia ,

September 15, 1950

Director, FBI

SECURITY INDEX
AND RELATED MATTERS

Reurlet August 2, 1950.

The Bureau has no objection to the practice now followed by your office of making a numerical notation on the face of your Security Index cards indicating the geographical section in which an individual's card is to be filed.

When information is obtained necessitating the submission of form FD-122 indicating changes in existing index cards, you should continue making informal notations on the cards maintained by your office in order that your Security Index cards will be up to date pending the receipt of new cards from the Bureau.

In regard to your request to be advised as to what disposition is to be made of the Security Index cards by the old office of origin pending the preparation of new Security Index cards by the Bureau for the new office of origin, you are advised that you should continue to forward the Security Index cards maintained on an individual to the new office of origin as enclosures with form FD-128 as in the past.

TO : DIRECTOR, FBI

FROM : SAC, CLEVELAND

DATE: June 21, 1950

SUBJECT: LOYALTY OF GOVERNMENT EMPLOYEES
SECURITY MATTER - C

Reference is made to SAC Letter No. 97, Series 1949, dated October, 1949, wherein is set forth that where a subject under investigation under the Loyalty Program is also the subject of a Security Index Card, it is desired that a dual character be used in reports, and that such reports be written according to the standards prevailing for Loyalty reports.

In those cases where the subject is employed in a Vital Facility, a Security Matter report, when prepared, is then disseminated to the appropriate agencies of the Armed Services.

The Bureau is requested to advise whether in those cases which carries the dual character, "LOYALTY OF GOVERNMENT EMPLOYEES, and SECURITY MATTER - C", these reports should likewise be furnished to the appropriate agencies of the Armed Forces.

Director, FBI

~~11-8~~
LOYALTY OF GOVERNMENT EMPLOYEES;
SECURITY MATTER - C

RECORDED - 122

Reurlet June 21, 1950, referring to SAC Letter #97, Series 1949, dated October, 1949, and requesting Bureau advice as to whether reports prepared in accordance with this SAC Letter bearing the dual character "Loyalty of Government Employees; Security Matter - C" should be furnished to appropriate agencies of the Armed Services where the individual involved is employed in a Vital Facility.

Reports bearing the dual character "Loyalty of Government Employees; Security Matter - C" are, of course, prepared only on those individuals who have been subjects of investigation under the Loyalty Program and who are subjects of Security Index Cards. In any event, the investigation under the Loyalty Program will have been completed. The dual character will appear only in those reports submitted on Security Index subjects subsequent to the completion of the loyalty investigation concerning them. Such reports are, therefore, in the nature of reports on Security Index subjects and do not comprise an actual report in the loyalty investigation itself, but are referred to the Loyalty Section of the Bureau for appropriate attention in the event the individual involved is still in the government service.

Section 69M of the Manual of Instructions, of course, sets forth instructions that field offices should not designate copies of loyalty reports as such for local representatives of ONI, IDA, or OSI. It is pointed out that should offices receive requests from a local representative of ONI, IDA, or OSI for copies of loyalty reports, the requesting representative should be advised that loyalty investigations are supervised and correlated at Bureau headquarters and for this reason it would be more desirable for the local representative of the Intelligence Agency to direct his request to his Washington headquarters for appropriate referral to the Bureau.

Since reports bearing a dual character of "Loyalty of Government Employees; Security Matter - C" prepared in accordance with SAC Letter #97, are not actually a part of the loyalty investigation itself, it will be permissible for your office to disseminate copies to appropriate agencies of the Armed Services where the subject is employed in a Vital Facility in the same manner that you would disseminate a report bearing the singular caption Security Matter - C. If, as a result of dissemination of reports of this nature, the receiving agencies should note the character Loyalty of Government Employees and make a request of your office for copies of the reports reflecting the actual loyalty investigation of the individual involved, you should abide by the instructions set forth in Section 69M of the Manual of Instructions, as set forth above, and tactfully advise the local representative of the Intelligence Agency making such requests to direct his request to his Washington headquarters for appropriate referral to the Bureau.

July 21, 1950

THE DIRECTOR

While talking to on other matters on the evening of July 20, he advised me that the Attorney General had instructed him to set up a staff of attorneys in the Department to review the files on all of the approximately 12,000 individuals on the Bureau's Security index, list. He stated that the Attorney General felt that if it became necessary to make arrests in an emergency that he should be in a position to say that he had had each case reviewed prior to the arrest.

I advised that I hoped if something like this was done that the Department would not set up a foolish system like had set up prior to the last war of maintaining classifications of dangerousness. stated he was aware of the unworkability of that system and that it was not intended to do anything of this kind; that the reports would be merely reviewed for the purpose of determining whether there was ample justification to maintain them on the list.

stated that knowing that the Bureau had already thoroughly investigated and evaluated each individual before his name was added to the list, that he anticipated that there would be practically no problem in the Department; that he was, however, going to assign six attorneys to this job; that he would submit the names of the six attorneys from the Department to the Bureau for a check before they are put on this task.

Director's Notation: "I shudder to think what this is going to be. Probably some of the Lawyer's Guild crowd in Dept. will make the review. Let me know the names of the Attys." H.

SUBJECT: SECURITY INDEX CARD STATISTICS

There is attached hereto a table showing by Field Office the total number of Security Index cards in our files. This table indicates the nationalistic tendency, the dangerousness classification, sex, race, citizenship status, and others on one of the "special" lists.

These statistics are based on Statistical Section records as of October 17, 1951.

SECURITY INDEX CASES - BY FIELD OFFICE
Based on Statistical Section Records as of October 17, 1951

227

7.10

KEY

FIELD OFFICE

The first four letters of the field office are used in all cases except St. Louis, which is coded STLO.

NATIONALISTIC TENDENCY OR ORGANIZATIONAL AFFILIATION

COM	Communist Party, USA
BUL	Bulgarian
ISL	Independent Socialist League
NPR	Nationalist Party of Puerto Rico
PPA	Proletarian Party of America
RWL	Revolutionary Workers League
RUS	Russian
POL	Polish
SWP	Socialist Workers Party
YUG	Yugoslavian
UPR	Union of the people for the establishment of the Republic of Puerto Rico
ULP	United Labor Party
HUN	Hungarian
MIS	Miscellaneous (any Nationalistic Tendency or Organizational Affiliation not listed)

DANGEROUSNESS CLASSIFICATION

DC	Priority Detention in the event of an Emergency (DetCom)
CS	Potential Communist Saboteurs (ComSab)
KP	Key Figures
TF	Top Functionary

CITIZENSHIP STATUS

NB	Native Born
NA	Naturalized
AL	Alien
UN	Unknown

SPECIAL SECTION

AEP	Atomic Energy Program employees
ESP	Espionage subjects
FGE	Foreign Government employees
GOV	United States Government employees
PRO	Prominent Person
UNE	United Nations employee
YUG	Pro-Tito

RE: SECURITY INVESTIGATION - INDIVIDUALS

In SAC Letter No. 48, Series 50, dated July 25, 1950, you were advised that in view of the critical international situation it was found necessary to broaden our standards to include in the Security Index the names of all individuals who are present, active, participating members of the Communist Party or related groups or who actively espouse the line of those groups, regardless of the individual's leadership in the Party, present employment or past activities.

Inasmuch as the Bureau may be called upon at any time to effect the apprehension of Security Index subjects, it is imperative that the names of all dangerous or potentially dangerous subjects be added to the Index as quickly as possible. To this end you must expedite these investigations in line with existing instructions and recommend the inclusion of an individual's name in the Index as soon as your investigation discloses his dangerous or potentially dangerous character. The remaining investigation must then be completed as soon as possible.

We have a direct responsibility to protect the internal security of the nation and I want it clearly understood that you must have included in the Security Index within the immediate future the names of all individuals in your division who meet the present standards for such inclusion.

This matter must receive your continuous personal attention.

Very truly yours,

John Edgar Hoover

Director

SECURITY INDEX - GENERALPURPOSE

file.

To inform you of the number of Security Index cards presently on

DETAILS

As of Friday, August 18, 1950, the Security Index contained a total of 12,288 cards. This is an increase of 106 since the last Security Index count made one week ago on Friday, August 11, 1950. Another count will be taken on Friday, August 25, 1950, and you will be advised of the results.

Re: ANTICIPATED INCREASE IN
SECURITY MATTER INVESTIGATIONS
IN THE NEW YORK OFFICE

Dear Sir:

Reference is made to SAC Letter #43, Series 1950, dated July 11, 1950, Page #7, Paragraph L, which pertains to the Security Index and which instructed that the previous criteria used to determine who should be investigated were to be broadened. Further reference is made to SAC Letter #48, Series 1950, dated July 25, 1950, which provides that present or alleged members of the Communist Party, the Socialist Workers Party and the Independent Socialist League are to be investigated with a view toward including them in the Security Index. This letter pointed out that the Bureau will now consider for the Security Index individuals who are present, active, participating members of the Communist Party or related groups or those who actively espouse the line of those groups.

In order that the effect of the foregoing instructions on the Security work of the New York Office may be seen, the following information is set forth.

It will be recalled that in April, 1948, the New York Office reviewed an approximate total of 119,000 closed and pending files in the and classifications. From these about 28,000 mimeographed forms were prepared indicating the identities of those individuals who should be included in the Communist index. Of the 28,000 forms completed, 3,654 were determined to pertain to subjects who fell within the category of those who should be considered subjects of Security Index cards (these categories were set forth on Page #5 of SAC Letter #57, Series 1948). Active cases were opened on all of the 3,654 individuals mentioned above.

Of the approximately 1,700 Security Matter cases pending in this office on July 31, 1950, it is estimated that about 1,200 fall within the category outlined in the above-mentioned SAC Letter #57. Although this backlog is steadily being decreased, it is noted that many cases included in this 1,200 are new ones in this category which have come to the attention of this office since April, 1948 and which are not included in the 3,654 originally opened. It is believed that the subjects of these cases, being more potentially dangerous to the country, should be cleaned up before throwing emphasis on the new cases which are now being opened pursuant to the instructions contained in the aforementioned SAC Letter #48, dated

229
change to 34-13

Letter to Director, FBI

July 25, 1950. With the present manpower available, it is estimated that it will take ten months to clean up these cases since it is necessary to work them concurrently with leads on cases originating in other field divisions.

With regard to the new policy and instructions set forth in SAC Letter #48, the following figures are set forth in an attempt to estimate the potential Security Matter case openings in this office. At the present time there are approximately 43,000 Communist Index cards. Based on a previous survey made at the time the Communist Index was set up, it is estimated that 77% or roughly 33,000 of these cards are on different individuals, the remaining ones being alias cards. Included in this figure are cards on approximately 2,700 individuals who are already the subjects of Security Index cards. It is further estimated that since April, 1948, investigations have been conducted on between 1,400 and 1,500 individuals on whom no Security Index card was recommended. In addition, it is estimated that background investigations were conducted on approximately 4,000 Communists in 1944 and 1945. Therefore, it is estimated that the Communist Index contains approximately 25,000 cards on individuals who have not been investigated. Of course, an unknown percentage of these individuals have moved away from the New York area or are no longer active, participating members in the Communist movement.

In analyzing the new Bureau instructions as they effect Security investigations in the New York Office, it was not deemed advisable to use the Communist Index as a basis for broadening the scope of Security investigations in view of the fact that SAC Letter #48 instructed that there should be considered for the Security Index individuals who are present, active, participating members of Communist groups. It is believed that the best way to comply with the Bureau instructions is to open these cases as information is received and processed indicating current Communist activity on the part of a subject. In this connection, it is noted that approximately 1,000 pieces of information pertaining to individuals is received each month from informants of all types, that is, trash covers, technical surveillances and live informants. Ordinarily, this information is received on the more active Communists, many of whom are the subjects of dead files but who have never been investigated because they did not fall within the previously mentioned category upon which case openings were based. It is contemplated, therefore, that cases will be opened for active investigation on these individuals as information is received indicating current activity on their part. It is estimated that this will result in cases being opened at the rate of 400 to 500 a month. In this connection, it is noted that from November, 1949 to May, 1950, Security Matter cases were opened at the rate of about 200 per month. A considerable number of these were cases originating

227 changed to
34-13

Letter to Director, FBI

in other offices. In June, 1950 the openings increased to about 250 and in July to 300. This increase was prior to our putting into effect the new Bureau instructions and was occasioned by more activity on the part of other offices and by case openings on other individuals named by ^{as} among the 400 concealed Communists. In addition, a considerable number of cases have been opened on Bureau instructions regarding individuals reported by the Washington Field Office as having visited Russia in the 1930s at the expense or sponsorship of the Communist Party.

Based on the foregoing information, it is estimated that during the next year between 7,000 and 10,000 Security Matter cases will be opened by this office. These will be afforded investigative attention at the earliest possible opportunity, it being recalled it has been estimated previously in this letter that with the existing personnel assigned to this type of work, it will take approximately ten months to investigate those cases already pending as of July 31, 1950. With regard to manpower, in November, 1949, there were 31 investigative agents assigned exclusively to Security Matter investigations. This number was gradually increased to about 50 agents, but during the past two months has been decreased to 34. This has been due mainly to a substantial increase in Loyalty cases.

By separate letter, the Bureau will be advised concerning the manpower needs of the New York Office as a whole.

Very truly yours,

SUBJECT: SECURITY INDEX CHART

- GENERAL

Purpose:

To bring to your attention a chart reflecting Security Index statistics and suggested letters transmitting copies of the chart to interested Government officials.

Details:

The chart is entitled, "Distribution of Individuals Dangerous to the Internal Security of the United States." You will note that it shows the geographical location of these persons according to FBI Field Divisions as well as data relating to their organizational affiliation, citizenship status, and sex.

Letters are attached transmitting this chart to the following persons:

1. Admiral [REDACTED], Special Consultant to the President.
2. Admiral [REDACTED], Naval Aide to the President.
3. Secretary [REDACTED] of the National Security Council
4. Mr. [REDACTED] of the National Security Resources Board.
5. Secretary of Defense [REDACTED]
6. The Attorney General.
7. The Central Intelligence Agency.
8. Assistant Chief of Staff, G-2.
9. Director of Naval Intelligence.
10. The Director of Special Investigations, Air Force.

Action:

It is recommended that the attached chart and letters be approved for immediate distribution.

Los Angeles 13, California

Director, FBI

Re: SECURITY INVESTIGATIONS OF INDIVIDUALS

Dear Sir:

Re SAC Letter No. 43 dated July 25, 1950, Section B., and
SAC Letter No. 54 dated August 4, 1950.

In accordance with Bureau instructions, cases have been opened in this office for investigation of all CP, SWP, ISL members reportedly currently active, who are not already the subjects of Security Index cards. In addition, all channelizing memoranda, complaint forms and other material received are being checked against each pertinent case file to insure that each currently active individual has been or will be considered for the Security Index. This examination of each case file constitutes a considerable administrative problem in this office, due to the large number of active informants furnishing current information and the greatly increased number of complaints being received.

To facilitate this review, the following suggestion is being made:

It is suggested that a 3x5 card be placed on top of the file cover and under the Acco fastener, to afford ready recognition of those files in which a Security Index card has already been authorized. This card may easily be removed upon cancellation of the Security Index card by the clerk who places the cancelled card in the 1-A exhibit envelope. It is believed that the use of these cards would result in a material savings of time in reviewing of files in connection with the above-mentioned incoming documents.

In the event the Bureau favorably considers this suggestion, it is suggested that the Los Angeles Office be furnished with a stamp bearing a notation, Security Index. This stamp would be utilized to mark the 3x5 card before it was placed on the file.

The Bureau's views in this matter will be appreciated.
